-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 6) ☐ Other: ____.

DETAILED ACTION

Drawings

1. The drawings are objected to because the reference numeral in fig 1 which identifies the "micro-controller" should be #22 instead of #12 (because #12 is instead the brushhead portion and the controller is also #22 in the specification, eg, page 3, line 10) . A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no prior mention or recitation of any "apparatus" to support the recitation thereof in claim 2 (line 6). Applicant should review the claims for any additional informalities.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1744

4. Claims 1,2,6,10,14,15,16,17 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Hilscher et al (US 2002/0129454). Hilscher discloses a toothbrush comprising a handle portion (1) and a head portion (2) and further wherein the head portion includes a means for storing information which identifies the particular head and further including means acting between the head and handle to enable the information in the head to be read by device in the handle. Hilscher discloses numerous ways for accomplishing the cooperation of the head and handle, including the use of a "smart label" (19) (which would be a ROM memory device) and wherein the data thereon is transmitted to the handle by radio signals (wireless, eg claim 10) and further wherein operation of the brush is prevented unless a proper head portion is detected by the handle portion (paragraph 0010). Also, the mode of operation can be dictated by the information from the head read by the handle (paragraph 0039).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9,11,12,20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hilscher et al (US 2002/0129454). The patent to Hilscher discloses the invention substantially as claimed and also discloses numerous ways in which the information of the brush can be transmitted or read by the handle (paragraph 0032).

The particular manner of transmitting the information of the above-noted claims would be obvious to one of ordinary skill in view of the noted suggestion of Hilscher.

Allowable Subject Matter

7. Claims 3-5,7,8,13,18 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
